Safety measures mean that airline transportation companies must restrict acceptance of liquids in the cabin.

1 - Obtain a transparent plastic bag that can be resealed (for example, a freezer bag) with a capacity of one liter (30 fl oz) maximum (size around 20cm x 20cm / 7,5 inch x 8 inch). Only one bag of this type is authorized per passenger.

2 - Place in this bag all liquids and similar products of which each container must not exceed 100 ml (3 fl oz) maximum.

3 - All other containers of a larger capacity must be properly protected and placed in your checked baggage.
