Mineral-rich hot water from far beneath the earth forms the spectacular lagoon, where a luxurious health spa has been developed in the rugged lava landscape. The lagoon's geothermal seawater is known for its positive effects on the skin. Enjoy the geothermal seawater and its active ingredients: Minerals, silica and algae. Transfer to your hotel in Reykjavik. Dinner at your hotel. Later this evening, discover the famous aurora borealis (northern lights) or perhaps reschedule on another evening depending on the sky conditions.

DAY 4 – REYKJAVIK - HELLA Begin your guided tour of The Golden Circle. A scenic drive covers about 300km looping from Reykjavik into central Iceland. The three primary stops on the route are the national park Þingvellir, the waterfall Gullfoss (meaning "golden falls"), and the geothermally active valley of Haukadalur, which contains the geysers Geysir and Strokkur. Though Geysir has been inactive for a long time, Strokkur, on the other hand, continues to erupt at 5–10 minutes intervals. Continue to Gullfoss Waterfall and Geysir Geothermal Strokkur. On to Hella for overnight.
